DETAILED ACTION

1. This communication is in response to amendment filed 9/19/2006.

Response to Amendment

2. Claims 3 and 4 have been canceled, claim 1 has been amended per request.
3. Claims 1, 2, 7-10 are pending and have been allowed.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kang S. Lim Reg. No. 37,491. Note that claim 1 has been amended to correct typographical errors.

Please amend claims 1 and 7-10 as follows.

Claim 1. A computer-implemented method for determining a preferred set of prices for a plurality of products, the method being implemented as a plurality of program instructions in a computer system, the method comprising:

receiving, using the computer system, a plurality of demand coefficients;

receiving, using the computer system, known cost data including activity-based costs;

inputting, using the computer system, missing or incomplete cost data to give inputted cost data;

combining using the computer system, said known cost data with said inputted cost data to give a combined cost data set;

Art Unit: 3693

generating, using the computer system, a sales model from the plurality of demand coefficients;

generating, using the computer system, a cost model from the combined cost data set, and wherein the activity-based costs include variable costs and fixed costs, further wherein said cost model determines a total cost for each product in a given demand group in a given store for a given time period by computing a cost for each selected costing activity;

receiving, using the computer system, a set of actual prices;

initializing, using the computer system, a set of incumbent prices to the set of actual prices;

generating a local optimum by applying, using the computer system, the set of incumbent prices to the sales model and the cost model wherein the local optimum for the preferred set of prices maximizes profit; and

generating the preferred set of prices by applying, using the computer system, the local optimum prices to the sales model and the cost model in an iterative manner until the preferred set of prices is reached.

Claim 7. The method, as recited in claim 1, wherein the cost data is from an individual store and the preferred set of prices is generated for said individual store.

Claim 8. The method, as recited in claim 1, wherein the cost data is from a cluster of stores and the preferred set of prices is generated for said cluster of stores.

Claim 9. The method, as recited in claim 1, further comprising: generating, using the computer system, equivalent prices for said plurality of products by dividing individual product prices by a standardized unit of measure; and

incorporating, using the computer system, said equivalent prices into said sales model.

Claim 10. The method, as recited in claim 1, wherein said demand group

Art Unit: 3693

is a set of highly substitutable products.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The claimed inventions pertain to a method for determining a set of prices for a plurality of products based upon profit optimization analysis.

The following prior art references have been deemed most relevant to the allowed claim(s):

Ouimet et al. (US 6,094,691) (Ouimet) discloses a method for determining a preferred set of prices for a plurality of products based on plurality of demand coefficients and cost data (see Figures 1 and 2 and col. 3-6). Ouimet also inherently teaches generating sales model and cost model (refer to demand models, referred to in col. 4-6).

Ouimet fails to teach generating a local optimum by applying a set of incumbent prices to the sales model and the cost model wherein the local optimum for the preferred set of prices maximizes profit and generating the preferred set of prices by applying the local optimum prices to the sales model and the cost model in an iterative model until the preferred set of prices is reached.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Art Unit: 3693

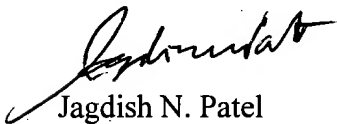

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
